

ORANGEVILLE VILLAGE BOARD SPECIAL MEETING
November 14, 2011

(The following is a summary of proceedings; the official minutes are subject to approval at the next scheduled meeting.)

The Board held a special meeting to discuss building improvements for Village Hall. The Board selected bids from Bob Leverton from Lena for installation of metal roofing in the amount of \$15,454; and from Loescher Heating & Air Conditioning for an 85% efficiency heating plant in the amount of \$3,950. The old heating plant dates from the 1950s. These will be paid from TIF funds as capital improvements.

ADA accessibility for the washroom and floor covering for the treasurer's office were discussed. Estimates for these projects are being gathered. Because of the cost to install central air conditioning, the Board approved purchase of one window unit for each floor.

The Board approved paying a bill from Clear Route Communications in the amount of \$740 for one year phone service. This clears liability from an unintended switch from Frontier.
